

# BICH 460: Genome Annotation with Ontologies

## 1CR T evenings 7-9PM

Looking for a genetics-related class that is both  
**USEFUL and INTERESTING?**

- Learn to *efficiently read and understand* scientific literature
- Learn to *use online biological data resources*
- Learn about *biocuration* & the how the *Gene Ontology* organizes scientific knowledge about what genes do
- *Tailor your own course* - you can work on any organisms/papers/genes you find interesting
- *Compete* with teams of students from around the world as part of the **Community Assessment of Community Annotation with Ontologies (CACAO)**
- *Contribute* to databases used by scientists worldwide

**NO PREREQUISITES** (CONTACT US), but you need to be an ACTIVE LEARNER, undaunted by the challenge of digging for information, and UNAFRAID OF ASKING QUESTIONS when you get stuck. This is a great class for getting letters of recommendation for jobs/grad school/med school/etc. - interviewers love hearing about this class

### For more information:

- check the website: <http://gowiki.tamu.edu/wiki/index.php/Category:CACAO>
- email us at [ecoliwiki@gmail.com](mailto:ecoliwiki@gmail.com) or
- come by the Hu lab, Bio/Bio Room 443
